Contents In 1938, archaeologist Indiana Jones is searching for the Staff of Ra, but the Nazis steal the artifact and bury it, hoping to use its power to find Atlantis. Jones chases the Nazis and discovers their plans to use the Staff of Ra for a genocidal attack on the people of Warsaw. Indiana Jones escapes from the hideout, but encounters Saboten, a giant robot that can breathe poisonous gas. Saboten immobilizes Indiana, and he runs into Sallah, who has been kidnapped. Jones rescues Sallah, and the two heroes defeat Saboten. However, Sallah is kidnapped again by Dr. Schtumpf, a Nazi doctor who plans to use the staff to carry out his twisted genocide. Jones must fight the doctor and his henchmen, along with Saboten, in order to save Sallah. Indiana Jones and the Staff of Ra received mixed reviews from critics.
